Atlantic Municipal Utilities

PO Box 517

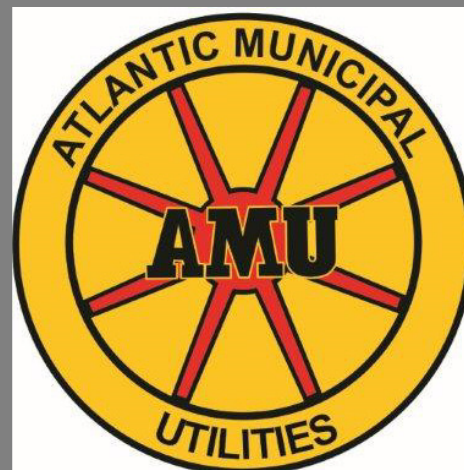

Atlantic, IA 50022

Incomplete information will delay or disqualify your rebate. Rebate applications must be postmarked within 30 days of purchase.

This rebate program is reviewed and authorized each year for incentives that are available from January 1 through December 31.

***AC units require a minimum SEER rating =>14.0**

***Heat Pump and Geothermal requires a minimum SEER => 14.5**

Program Details

This program is available to any AMU customer who purchases and installs energy efficient cooling equipment at Residential or Small Commercial locations serviced by Atlantic Municipal Utilities. Eligible equipment includes Central Air Conditioners with SEER ratings of 14 and higher; and electric heat pumps, either air-to-air or geothermal, with SEER ratings of 14.5 and higher. The installation of a geothermal heat pump system shall also be eligible for an additional rebate of \$500.00 if a ground-loop system is installed.

Conditions: Heat loss/heat gain calculations must be completed on all facilities where equipment is to be installed. The heating and cooling dealer should perform these calculations. AMU will inspect facilities for proper installation and to verify sizing. **Heat pumps will be checked for size, model number, and matching coils. In addition, heat pumps will be inspected for performance within the parameters of the manufacture specifications. Heat pumps must be utilized for heating as well as cooling, with controls which will allow the heat pump to be the primary source of space heating until outside ambient temperatures fall below 20 degrees F.** AMU will withhold payment if any discrepancies exist, until the dealer makes necessary corrections. Property owner and customer agree to allow AMU access to any and all affected equipment for the purposes of inspection and verifications.

All information requested on this Application form must be provided, including copies of all invoices related to the installation.

AMU reserves the right to discontinue this program at any time, without notice, and to make minor adjustments to the program requirements from time to time, as deemed necessary to clarify or improved the program. Rebates may be limited to 5 ton systems or smaller. Customers with larger or specialized systems should consult AMU prior to purchasing equipment.

All rebates will be applied as a credit to the customer's account.
